

The Simpsons are putting on a big BBQ party and have invited their family and friends. Homer created a list of people he wants to be at the BBQ and some people who are NOT going to be there. Any family members can be at the BBQ party for free but his friends and colleagues have to pay \$30. There's also some BANNED people!

Lisa will clean up her Dad's list using a Java program. There is a completed Person class file, an unfinished Guests class file, an unfinished client program and a text file called "HomersList.txt".

Finish coding the Guests class file and the client program. Read the comments in the files to guide you.
